# **Doxing**

## What is Doxing ?

**Ans** :- Doxing("Documents" or "Docx") is the part of technique "Tracing".it plays an important role in tracing. To gathering all available information is called as doxing. In infomartion there are many informations like documents, victim's name, gender and also that on internet on which which website, the person is there and by which which name and nick name. We are choosing the specific target. In this tutorial i will show you how to get the information about any particular induvidual. Doxing is easy depends on the available information about the specific target and it also depends on that how many information is available of that specific target right now. Doxing the chnique is very useful to solve the "Cyber Crime Cases". With the help of this tutorial you will come to know that how the hackers dox the innocent people and make them victim to hack their email id accounts, Facebook accounts and their wesbsites by implementing social engineergin techniques.

#### *For the Specific Target Here are some parts for which you should collect the information.*

- (1) Name
- (2) Gender
- (3) Birthday
- (4) Age
- (5) Website
- (6) Email Id
- (7) Social Networking Site Profiles -> Facebook/Yahoo/Orkut/Twitter/My space
- (8) Location/Area/Country
- (9) IP Adress

Once hacker haveall this information, the next step of hacker is to go to the <u>http://www.google.com/</u> and he can input the name of the specific target. The target's all social networking site profile id will display google. Hacker will copy paste it and then open that link into his browser. Then he/she can see the every information about the target. If the target's profile ids completely proivate then hacker can make a girl's profile and then can add him/her.-\*( Best Solution :- Social Engineering Technique).

### How To Do Doxing : -

## <u>Ans</u> :-

## (1) Using The Email Adress Of Your Target

So, We have some basic very nice website to find the information about target. Step :- 1 Click on the Email Step :- 2 Provie Email adress and then click on search. Step 3 :- It wll show all the profiles which is made by this email id which u have given to Pipl.com of target.

Websites Used For Doxing :-<u>www.pipl.com</u> (i will recommanded you this) <u>www.wink.com</u> <u>www.123people.com</u> <u>www.zabasearch.com</u>

## (2) Using The Name Of Your Target

Here also We have some basic very nice website to find the information about target. Step :- 1 Click on the Name Step :- 2 Provie Name and then click on search. Step 3 :- It wll show all the profiles which is made by this name/nickname which u have given to Pipl.com of target.

Websites Used For Doxing :-<u>www.pipl.com</u> (i will recommanded you this) <u>www.wink.com</u> <u>www.123people.com</u> <u>www.zabasearch.com</u>

#### (3) Using The Location Of Your Target

Here you can do doxing with the help of the adress also. There are some sites which provides this type of services. If target has given any adress to the any social networking website then you can trace it by the help of the given below website. Websites :-<u>www.addresses.com</u> <u>www.411locate.com</u> www.411.com

www.whitepages.com

#### (4) **Do Doxing With The Help of google**

Google is the very nice site and souce to do the doxing. Example :- Here i m Providing name – "XYZ" and we will see that how one can mine the google dork and can find the eveything.

- a. Inurl :- This is a very nice dork to find the website directly from the google.suppose i want to find the <u>www.chintan.com</u> then i will give this type of query. Inurl:.sitename.com
- b. Intitle :- This is also a nice query.if suppose on any page the world "XYZ" is written in the title then i can find it directly by this query. Intitle:xvz
- c. Intext :- On any webpage of the world, if the name is written like "xyz" then i can find by this a simple query. Intext:xyz

#### Now we will bind this all query to do doxing.

Case 1 :- Suppose i want to find the person named "xyz" but only from this website <u>www.site.com</u>. Then i will make this query. Inurl:.sitename.com & intitle:xyz or

*Inurl:*. *sitename.com* & *intext:xyz* 

This query will give me the all result of the web page of the website freehacking.net which have this XYZ name on any particular page.

So, This are the basic techniques of doxing.
